Quality and Environmental Policy			

Quality and Environmental Policy for Ymer Technology and Ymer Industrial

Ymer Technology's quality and environmental policy is to achieve sustained, profitable growth by delivering products that consistently meet the needs and high expectations that characterize our customers, both in the Off-high way and Wind sector

This level of quality is achieved by implementing our quality management system according to Ymer Technology's ISO 9001:2015 certification, it reflects the skills and legal requirements the company's existing customers, potential customers, and independent auditing authorities demand, independently of geographical location.

All employees within the Company shall know, follow and understand the meaning of the overall quality and environmental policy and be aware of their own department's local quality and environmental targets.

At the Management Review occasion (once a year in January or February), evaluation of the policy is to be done, and changes will be approved and signed by General Manager.

The policy is to be presented on notice boards in all Ymer plants.

The quality department is responsible for that company policy is known and understood by all employees, within the Company and by customers, suppliers, entrepreneurs and authorities.

Quality:

We are committed to deliver what the customer has ordered in the agreed Quality and in time.

Satisfied customers are the basis of our business.

We continuously improve our processes and operations through critical risk assessment created by each departments in Ymer Technology to ensure that the capability is able to match defined level of quality even in the future.

Knowledge and cooperation are key stones of our success.
